

Inspectis Borescope

Endoscope Inspection System

The Inspectis Borescope is a 1.7mm diameter flexible endoscope which includes a 1.2mm camera in the distal tip of the device. Equipped with high quality 90°-120° FOV optics and a large LED that is located in the base of the device, the camera offers a variety of applications.

This camera-plus-illumination solution has a 2 meter flexible shaft. The illumination is LED through the shaft toward the distal tip of the device (where the camera is located) via fiber-for-illumination. The LED is powered by the video processor and, therefore, no additional peripherals are required other than a monitor for visual inspection.

Key Features:

- ◆ Diameter of shaft: 1.7mm
- ◆ Available length of shaft (2 meter)
- ◆ Advanced digital image processing to ensure the best image quality
- ◆ Recording and storage capability to external media
- ◆ HDMI and USB outputs
- ◆ Can connect to Windows Computer or Tablet
- ◆ Frame rate: 30 fps
- ◆ Resolution: 400x400 px (160kpx)
- ◆ Optics: FOV 90° - 120°
- ◆ Depth of field: 3-50mm (for 100° FOV optics)
- ◆ One (1) year warranty
